Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

INDIA'S NEW CAPITALISTS Harish Damodaran 2018-11-25 It's no secret that certain social groups have predominated India's business and trading history, with business traditionally being the preserve of particular 'Bania' communities. However, the past four or so decades have seen a widening of the social base of Indian capital, such that the social profile of Indian business has expanded beyond recognition, and entrepreneurship and commerce in India are no longer the exclusive bastion of the old mercantile castes. In this meticulously researched book – acclaimed for being the first social history to document and understand India's new entrepreneurial groups – Harish Damodaran looks to answer who the new 'wealth creators' are, as he traces the transitional entry of India's middle and lower

peasant castes into the business world. Combining analytical rigour with journalistic flair, India's New Capitalists is an essential read for anyone seeking to understand the culture and evolution of business in contemporary South Asia.

Building and Operating a Realistic Model Railway Allen Jackson 2016-08-31 This informative book provides a step-by-step account of the construction, from scratch, of a model railway called Dovedale. The model is operated like a real modern railway and was built entirely by the author within a strict low budget, using, wherever possible, recycled materials. Moreover, Dovedale is based on a specific prototype that exists in Buxton in Derbyshire, where freight trains run into an interchange siding, the locomotive runs round the train and then departs to a different destination. Some model railways are operated somewhat chaotically and are characterized by frequent derailments and locomotives that stop arbitrarily. If you wish to move away from this kind of layout and construct a model railway that operates realistically and reflects more closely the way that railways actually work in the second decade of the 21st century, then this is the book for you. Whilst constantly emphasizing realistic operation, the book covers layout planning and construction, controllers, point motors, power supply, cables and connectors, ways of operating traffic flows, signalling, track droppers, control panels and wiring, control and interlocking, lighting, sequence and block bells, the use of closed circuit television, and much more. Superbly illustrated with 258 colour photographs and diagrams.

Motor-cycling for Women 1928 Nancy Debenham 1928 Betty and Nancy Debenham were a pair of young adventurous lady motorcyclists who entered trials competitions on equal terms with men in the 1920's. Although they were serious motorcyclists they never let this get in the way of their tremendous sense of fun.

Their spirit shines through in 'Motor Cycling for Women'. A practical and yet at times eccentric and quirky book from a bygone era that will make you smile.
