Pre-Incident Indicators of Terrorist Incidents Brent L. Smith 2011-01 This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Anna Sokolow Larry Warren 2012-11-12 A pioneer choreographer in modern American dance, Anna Sokolow has led a bewildering, active international life. Her meticulous biographer Larry Warren once looked up Anna Sokolow in a few reference books and found that she was born in three different years and that her parents were from Poland except when they were in Russia, and found many other inaccuracies. Drawing on material from nearly 100 interviews, Larry Warren has created a fascinating account and assessment of the life and work of Anna Sokolow, whose nomadic career was divided between New York, Mexico, and Israel. Setting her work on more than 70 dance companies, Anna Sokolow not only pioneered the development of a personal approach to movement, which has become part of the language of contemporary dance, but also created such masterpieces as Rooms, dealing with loneliness and alienation, and Dreams, which concerns the inner torment of victims of the Nazi Holocaust.
