Cheap Sex Mark Regnerus 2017-08-02 Sex is cheap. Coupled sexual activity has become more widely available than ever. Cheap sex has been made possible by two technologies that have little to do with each other - the Pill and high-quality pornography - and its distribution made more efficient by a third technological innovation, online dating. Together, they drive down the cost of real sex, and in turn slow the development of love, make fidelity more challenging, sexual malleability more common, and have even taken a toll on men's marriageability. Cheap Sex takes readers on an extended tour inside the American mating market, and highlights key patterns that characterize young adults' experience today, including the timing of first sex in relationships, overlapping partners, frustrating returns on their relational investments, and a failure to link future goals like marriage with how they navigate their current relationships. Drawing upon several large nationally-representative surveys, in-person interviews with 100 men and women, and the assertions of scholars ranging from evolutionary psychologists to gender theorists, what emerges is a story about social change, technological breakthroughs,

and unintended consequences. Men and women have not fundamentally changed, but their unions have. No longer playing a supporting role in relationships, sex has emerged as a central priority in relationship development and continuation. But unravel the layers, and it is obvious that the emergence of "industrial sex" is far more a reflection of men's interests than women's.

Disasters, Risks and Revelation Steve Matthewman 2016-04-29

Disasters are part of the modern condition, a source of physical anxiety and existential angst, and they are increasing in frequency, cost and severity. Drawing on both disaster research and social theory, this book offers a critical examination of their causes, consequences and future avoidance.

Radical Left Parties in Government Yiannos Katsourides 2016-09-22

This book provides a comparative analysis of how two radical left parties achieved government participation and their subsequent political experiences. In the face of the most severe and most prolonged crisis in the history of capitalism, it would be expected for radical left parties to seize the opportunity to promote their political agenda. Although reality has often confounded prognosis, two particular radical left parties – the Greek SYRIZA and the Cypriot AKEL – were elected to the highest government office. The author uses these two examples to engage with the broader question of what to expect when left-wing radicals achieve governance. This question is now of particular importance given the emergence of radical leftists in other parts of Europe, including Corbyn in the UK and Podemos in Spain.

Crashed Adam Tooze 2018-08-07 WINNER OF THE LIONEL GELBER PRIZE A NEW YORK TIMES NOTABLE BOOK OF 2018 ONE OF THE ECONOMIST'S BOOKS OF THE YEAR A NEW YORK TIMES CRITICS' TOP BOOK "An intelligent explanation of the mechanisms that produced the crisis and the response to it...One of the great strengths of Tooze's book is to demonstrate the deeply intertwined nature of the European and American financial systems."-- The New York Times Book Review From the prizewinning economic historian and author of Shutdown and The Deluge, an eye-opening reinterpretation of the 2008 economic crisis (and its ten-year

aftermath) as a global event that directly led to the shockwaves being felt around the world today. We live in a world where dramatic shifts in the domestic and global economy command the headlines, from rollbacks in US banking regulations to tariffs that may ignite international trade wars. But current events have deep roots, and the key to navigating today's roiling policies lies in the events that started it all—the 2008 economic crisis and its aftermath. Despite initial attempts to downplay the crisis as a local incident, what happened on Wall Street beginning in 2008 was, in fact, a dramatic caesura of global significance that spiraled around the world, from the financial markets of the UK and Europe to the factories and dockyards of Asia, the Middle East, and Latin America, forcing a rearrangement of global governance. With a historian's eye for detail, connection, and consequence, Adam Tooze brings the story right up to today's negotiations, actions, and threats—a much-needed perspective on a global catastrophe and its long-term consequences.

Captivating Technology Ruha Benjamin 2019-06-07 The contributors to Captivating Technology examine how carceral technologies such as electronic ankle monitors and predictive-policing algorithms are being deployed to classify and coerce specific populations and whether these innovations can be appropriated and reimaged for more liberatory ends.

Principles of Accounting Volume 1 - Financial Accounting Mitchell Franklin 2019-04-11 The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation

that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

Misinformation in Referenda Sandrine Baume 2020-07-08 The book identifies the impact of misinformation in the context of referenda.

While the notion of misinformation is at the centre of current events and is the subject of several studies, it has rarely been addressed in the context of referenda or from a multidisciplinary and comparative perspective. This book fills this gap. Different legal orders have been chosen because of their extensive referendum practices (California and Switzerland); a recent legislative process on the issue of misinformation (Germany, France, and Canada); or recent experience with a vote during which it was considered that false information had been disseminated (Brexit, Catalan independence, and Italian constitutional referendum of 2016). By bringing together authors from the political and legal sciences, the book focuses on combining the expertise of researchers from different backgrounds and origins in order to propose innovative solutions. In this regard, the book is characterized by the fact that it does not aim to combat misinformation per se, but develops suggestions meant to guarantee the conditions of formation of the political will during referenda. The book will be an invaluable resource for legal scholars, political scientists, and specialists of political communication. Outside the world of academia, the book may draw the attention of policy-makers, practitioners, and journalists confronted with the challenges of misinformation or disinformation.

Communities in Action National Academies of Sciences, Engineering, and Medicine 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Subsystem and Transaction Monitoring and Tuning with DB2 11 for z/OS Paolo Bruni 2015-07-29 This IBM® Redbooks® publication discusses in detail the facilities of DB2® for z/OS®, which allow complete monitoring of a DB2 environment. It focuses on the use of the DB2 instrumentation facility component (IFC) to provide monitoring of DB2 data and events and includes suggestions for related tuning. We discuss the collection of statistics for the verification of performance of the various components of the DB2 system and accounting for tracking the behavior of the applications. We have intentionally omitted considerations for query optimization; they are worth a separate document. Use this book to activate the right traces to help you monitor the performance of your DB2 system and to tune the various aspects of subsystem and application performance.
