Guidelines provide a comprehensive synthesis of all available information relevant to the clinical topic. Practice guidelines can be vehicles for educating psychiatrists, other medical and mental health professionals, and the general public about appropriate and inappropriate treatments. The series also will identify those areas in which critical information is lacking and in which research could be expected to improve clinical decisions. The Practice Guidelines are also designed to help those charged with overseeing the utilization and reimbursement of psychiatric services to develop more scientifically based and clinically sensitive criteria.

The Sailor who Fell from Grace with the Sea Yukio Mishima 2010-01-26 A band of savage thirteen-year-old boys reject the adult world as illusory, hypocritical, and sentimental, and train themselves in a brutal callousness they call 'objectivity'. When the mother of one of them begins an affair with a ship's officer, he and his friends idealise the man at first; but it is not long before they conclude that he is in fact soft and romantic. They regard this disillusionment as an act of betrayal on his part - and the retribution is deliberate and horrifying.
