Looptail Bruce Poon Tip 2013-09-17 This book combines an extraordinary first-person account of an entrepreneurial instinct to start and develop a highly-successful international travel adventure company and reveals unusual management secrets that not only keep employees fully engaged but also keep customers extremely happy. After being fired from McDonald's as a teenager, Poon Tip decided that if he wanted to be successful in life, he would need to be self employed. To do that, he started G Adventures in 1990 with financing based upon his maxed-out credit cards. But the results were startling: people loved going on vacations to exotic spots around the world where they dealt with adventure and action. G Adventures is not for the faint of heart - it's for people who want to get away AND have memories to cherish for a lifetime. What makes G Adventures so successful? Poon Tip has created an entirely new and refreshing approach to management, which is related in LOOPTAIL. In his company, there's no CEO - but there is a company Mayor. There is no HR dept - but there is a Talent Agency and a company Culture Club. Poon Tip even offers any employee a check for \$5,000 if he or she can actually hurt his feelings with less than positive feedback about the company and how it's being run, So far, nobody has claimed the prize.

The Dry Forests and Woodlands of Africa Emmanuel N. Chidumayo 2010-09-23 The dry forests and woodlands of Sub-Saharan Africa are major ecosystems, with a broad range of strong economic and cultural incentives for keeping them intact. However, few people are aware of their importance, compared to tropical rainforests, despite them being home to more than half of the continent's population. This unique book brings together scientific knowledge on this topic from East, West, and Southern Africa and describes the relationships between forests, woodlands, people and their livelihoods. Dry forest is defined as vegetation dominated by woody plants, primarily trees, the canopy of which covers more than 10 per cent of the ground surface, occurring in climates with a dry season of three months or more. This broad definition - wider than those used by many authors - incorporates vegetation types commonly termed woodland, shrubland, thicket, savanna, wooded grassland, as well as dry forest in its strict sense. The book provides a comparative analysis of management experiences from the different geographic regions, emphasizing the need to balance the utilization of dry forests and woodland products between current and future human needs. Further, the book explores the techniques and strategies that can be deployed to improve the management of African dry forests and woodlands for the benefit of

all, but more importantly, the communities that live off these vegetation formations. Thus, the book lays a foundation for improving the management of dry forests and woodlands for the wide range of products and services they provide.

Encyclopedia of Cremation Lewis H. Mates 2016-04-29 The Encyclopedia of Cremation is the first major reference resource focused on cremation. Spanning many world cultures it documents regional histories, ideological movements and leading individuals that fostered cremation whilst also presenting cremation as a universal practice. Tracing ancient and classical cremation sites, historical and contemporary cremation processes and procedures of both scientific and legal kind, the encyclopedia also includes sections on specific cremation rituals, architecture, art and text. Features in the volume include: a general introduction and editorial introductions to sub-sections by Douglas Davies, an international specialist in death studies; appendices of world cremation statistics and a chronology of cremation; cross-referencing pathways through the entries via the index; individual entry bibliographies; and illustrations. This major international reference work is also an essential source book for students on the growing number of death-studies courses and wider studies in religion, anthropology or sociology.

Bark Canoes and Skin Boats of North America Edwin Tappan Adney 2014-04-01 Everything you need to know about the nearly lost art of bark and skin craft. The bark canoes of the North American Indians, particularly those made of birch bark, were among the most highly developed manually propelled primitive watercraft of their time. They could be used to carry heavy loads in

shallow streams but were light enough to be hauled long distances over land. Built with Stone Age tools from available materials, their design, size, and appearance were varied to suit the many requirements of their users. Upon arrival in North America, European settlers began using the native-made craft for traveling through the wilderness. Even today, canoes are based on these ancient designs. *Bark Canoes and Skin Boats of North America* combines historical background with easy-to-understand, practical instructions. Author Edwin Tappan Adney, born in 1868, devoted his life to studying canoes and was practically the sole scholar in his field. His papers and research have been assembled by a curator at the Smithsonian Institution and illustrated with black-and-white line drawings, diagrams, and photos. Included here are measurements, detailed drawings, construction methods, and models. The book covers canoes from Newfoundland to the Pacific Ocean, as well as umiaks and kayaks from the Arctic. *Bark Canoes and Skin Boats of North America* is not only a must-have for boatbuilding hobbyists, but also for those with a fascination for the history behind them. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history--books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.
